

FF 20

FF 20 **WATERBASED CURING** **SOLUTION**

FF 20 (Floor Finishing) is a water based solution, which seals and cures the surface of cementitious industrial floors. It is used as a last technological operation after pouring the floor.

SPECIAL PROPERTIES:

Water based, no unpleasant odours.

Application 24 hours after placing the screed.

METHOD OF USE:

FF 20 can be applied onto cementitious screed cca. 24 hours after its placing. The substrate should be free of water and impurities.

APPLICATION:

The typical way of use is to apply it on the top of floor. The area should be divided into adequate parts, where the specified quantity of the sealer should be used.

FF 20 should be applied in two coats in the total quantity of 0.10 to 0.20 l/m².

The application should be made with a sprayer.

FF 20 provides unified glossy finish.

PACKAGING:

FF 20 is supplied in 20 l or 60 l cans.

COVERAGE / YIELD:

FF 20 5 to 10 m² / l, i.e. 0,10 to 0,20 l / m² (one coat).

DRYING TIME:

The surface is touch dry after 2 to 4 hours at 20°C.

Completely dry after 24 hours at 20°C.

SHELF LIFE:

12 months from the dispatching date in unopened original containers.

Protect from frost and high temperatures.
