

# FUGAPLAST

## FUGAPLAST JOINT SEALER

**FUGAPLAST** is an expandable joint filler and cap used to seal expansion joints.

Its special shape enables it to maintain its position without coming out or dropping down into the joint.

It can be supplied in a variety of sizes depending on the size of the cutting disc.

**Item 55B:** 3.8 mm for 2.8 mm discs

**Item 55G:** 6.0 mm for 4.2 mm discs

It is available in grey colour.

It can be used as a definitive seal or as a temporary seal awaiting subsequent sealing with elastic materials.

### FIELDS OF APPLICATION

For industrial concrete floors:

- Easy to apply
- Protects edges
- Easy to remove
